Kittorrent
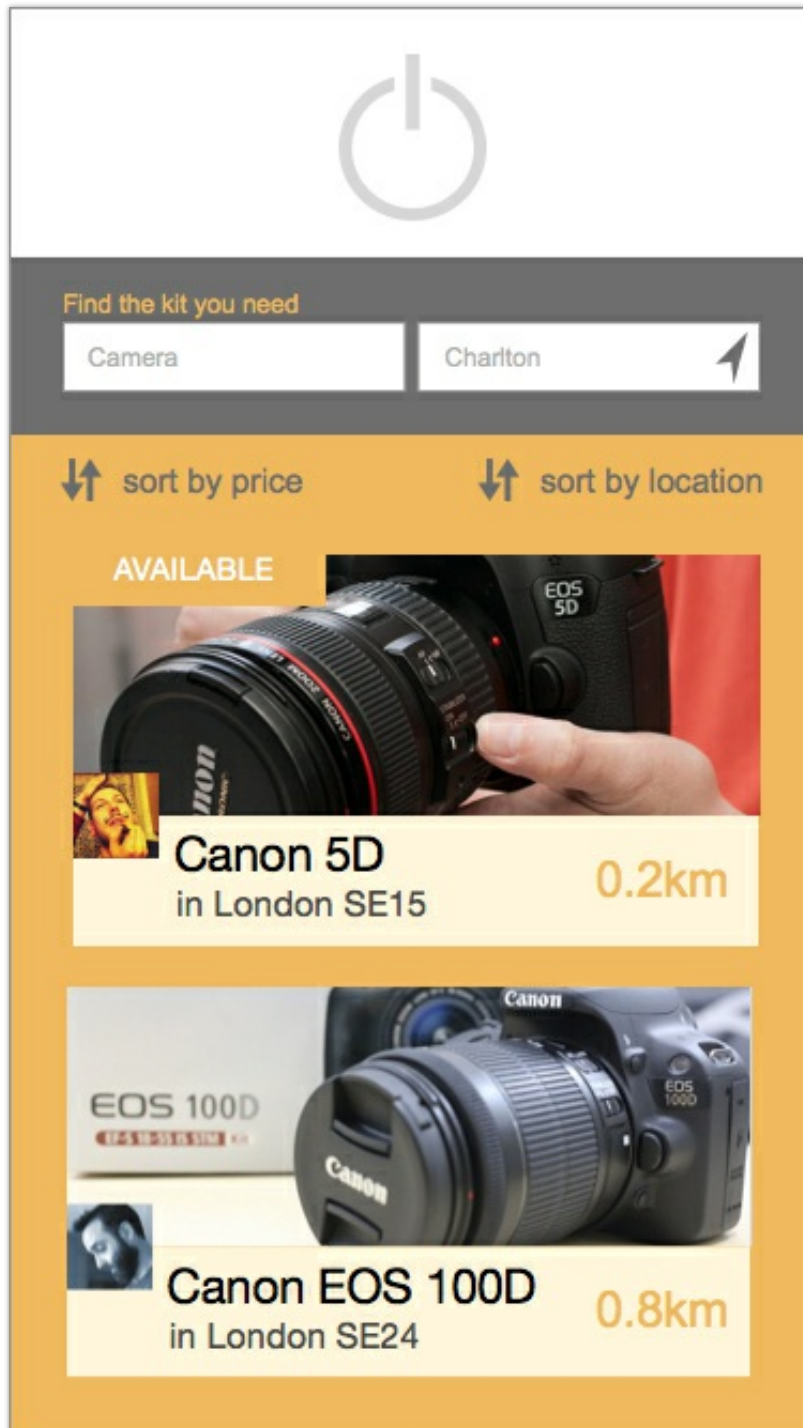

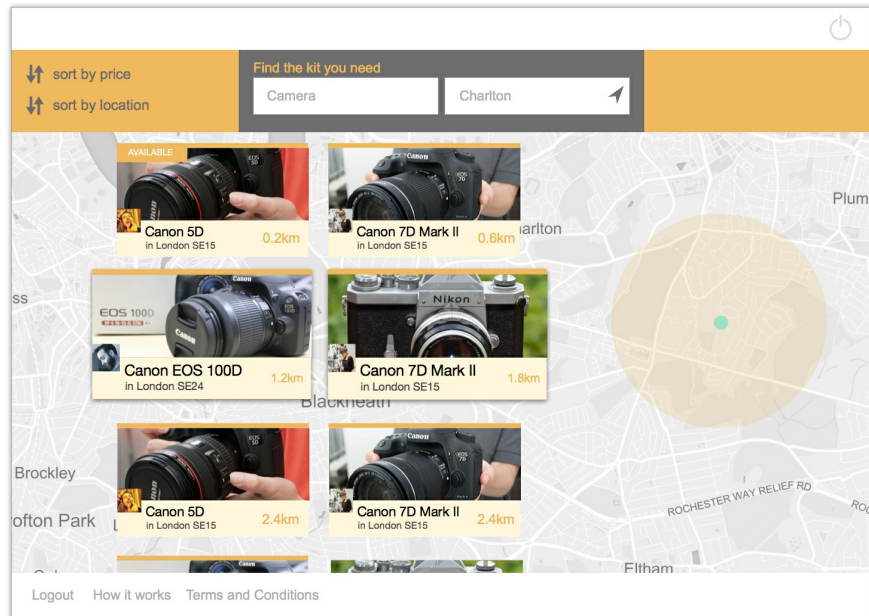

Search Enhancement

This iteration on search adds some key features to enhance the user's experience of finding kit on the site.

- There are two search input fields, *what* and *where*
- You can center the map to your location by clicking on the *location icon* in the where field
- You can sort the results by price low to high, high to low
- You can sort the results by distance, closest to furthest
- The search results display the distance from the search epicenter
- The proximity

On phones

(╯ °□°）╯ ︵TABLEFLIP

On desktops

The *where* field will except a postcode, area or street name. If you click on the *location icon* a little spinner indicates the browser is working before your current location becomes the epicenter of the search.
